Welcome

Dear Friends and Colleagues,

It is with the greatest pleasure that I, on behalf of the Otolaryngology Department of Alexandria Medical School, welcome you to our 10th International Septorhinoplasty Course.

This annual Course is designed to offer in-depth coverage into the art of rhinoplasty. Both functional and aesthetic aspects of this complex procedure will be discussed, from fundamentals to the latest advancements in the field.

Our faculty this year has been selected from different disciplines including Otolaryngology, Plastic surgery, and Maxillofacial surgery making sure to include surgeons of acknowledged substantial experience in Rhinoplasty to ensure a truly advanced and sophisticated educational experience.

A full day of live surgery by the distinguished faculty will allow them to demonstrate their different strategies and techniques in dealing with various nasal deformities.

Our limited-enrollment policy is meant to encourage and maximize the interactive exchange between participants and our expert faculty members.

I hope you all will benefit the most from this intense learning opportunity and that you will enjoy your stay in our beloved City of Alexandria; one of the historic pillars of knowledge and culture.

Hossam Foda, M.D
